What is Scalp Psoriasis?

Scalp Psoriasis occurs in patches on the scalp. These patches are often red and raised. Psoriasis often clears up but returns at some time in the future. Most sufferers have the problem of large amounts of skin flakes like severe dandruff. Scalp psoriasis sufferers sometimes may have psoriasis elsewhere on the body .

What is Seborrheic Dermatitis?

Seborrheic Dermatitis & Scalp Psoriasis both have the excessive flaking of skin scales like severe dandruff.

Seborrheic Dermatitis usually has much less redness on the scalp and no red raised areas. Itching of the scalp is common and it may occur on the scalp, forehead and behind the ears as these areas have a high number of seborrheic oil glands in the skin. This condition is more common and often more severe in fair skinned people.

Both Psoriasis & Seborrheic Dermatitis are treated in the same way. Scalp Psoriasis often takes longer to clear up.

Seborrheic Dermatitis

Treatment of Scalp Psoriasis & Seborrheic Dermatitis.

Anti Dandruff Shampoos can be effective for mild cases but vary widely in their effectiveness.

Chances are you are reading this because you have tried these products and they have not worked for you.

Prescription Cortisone lotions are often used and can be very effective but should only be used intermittently.

Some people have concerns about using cortisone products and prefer products which contain no cortisone such as David's Scalp Psoriasis Lotion Which is effective against Scalp Psoriasis & Seborrheic Dermatitis.

Treatment Tips.

Treatments with a penetrating oil base that are left on for a prolonged period will remove much more scale than any shampoo treatment.

Applying a treatment at night then washing it out in the morning will rapidly remove any problem scaling.

The combination of Coal Tar and the Scale Removing ingredient Salicylic Acid in a penetrating oil base is what makes David's Psoriasis Scalp Lotion extremely effective.

Good Results can be expected in 14 days or less. Although our Scalp lotion is highly concentrated, The oil base makes it very low irritant. (David's Scalp Lotion is up to 10 times stronger than most Tar shampoos & treatments available.)

Treatment Results to expect.

You should apply the lotion each night and shampoo it out in the morning. Do this until the problem has cleared up then stop. This will normally take less than 14 days even for severe cases.

Results to Expect Continued.....

You should notice a rapid and steady improvement without any irritation.

Nightly application and daily shampooing may not be convenient to some people. You can use the treatment less often but the results will be slower to achieve. It is only necessary to apply the treatment to the affected areas which means it is highly effective but very economical to use.

Can I Use it with other Products?

Yes Certainly !!

Any good shampoo and conditioner can be used with David's Scalp Treatment.

Two products we recommend highly are Ego Shampoo and Conditioner.

These are mild enough to use every day to maintain healthy scalp and hair and are extremely good for people who prefer to wash their hair less often .

My hair is permed so I can't wash it daily. Will your Treatment still work?

Yes, but results will take longer to achieve.

You will get excellent results however.

Remember, We guarantee you will be happy with the results or we refund your money!
